

## NEGATIVE & POSITIVE LIST FOR ENVIRONMENT & SOCIAL MANAGEMENT FRAMEWORK

<b>World Bank Safeguards</b>	<b>Negative List</b>
Environmental Assessment	<ul style="list-style-type: none"> <li>- Areas of known/suspected contamination due to hazardous substances</li> <li>- Activities having “significant adverse cumulative/transboundary impacts”</li> </ul>
Land-use pattern	<ul style="list-style-type: none"> <li>- Construction in areas causing a significant change in existing land use pattern.</li> </ul>
Natural habitats	<ul style="list-style-type: none"> <li>- Involves any works in protected areas or in or around sensitive/critical natural habitats</li> <li>- Significant conversion or degradation of natural habitat or where the conservation and/or environmental gains do not clearly outweigh any potential losses.</li> <li>- Disrupt wildlife and vegetation/Greenland/Flora</li> <li>- Selection of sites where threatened and endangered species, migratory pathways have been reported</li> </ul>
Physical Cultural Resources	<ul style="list-style-type: none"> <li>- Loss or damage to cultural property, including sites having archeological (prehistoric), paleontological, historical, religious, cultural and unique natural values, livelihoods including cultural resources.</li> </ul>
Indigenous Groups	<ul style="list-style-type: none"> <li>- Likely to create adverse impacts on ethnic group/villages/and or neighboring villages or unacceptable to ethnic groups living in a village of mixed ethnic composition.</li> </ul>
Forests	<ul style="list-style-type: none"> <li>- Clearance of ecologically sensitive/protected forests</li> </ul>
Land Acquisition	<ul style="list-style-type: none"> <li>- Areas under Anti Encroachment Drive</li> <li>- Cause any displacement or severe loss of livelihood</li> </ul>

<b>Positive List</b>
<ul style="list-style-type: none"> <li>- Optimizing use of available natural resources by utilization of existing material/debris of the damaged houses.</li> <li>- Stakeholder involvement and commitment during construction.</li> </ul>
<ul style="list-style-type: none"> <li>- Use of renewable energy (solar) and environmentally friendly techniques for construction</li> </ul>
<ul style="list-style-type: none"> <li>- Usage of water conservation techniques as part of the design.</li> </ul>
<ul style="list-style-type: none"> <li>- Appropriate design considerations to minimize adverse impacts on environment (flora, fauna, natural resources, cultural resources) and human and community health.</li> </ul>
<ul style="list-style-type: none"> <li>- Construction, rehabilitation and design improvement of existing settlement improvement/protective infrastructure.</li> </ul>
<ul style="list-style-type: none"> <li>- Activities designed specifically to avoid disturbance or nuisance to the local community in terms of high noise, usage of scarce/valuable natural resource.</li> </ul>
